

Mechanic – Millwright, Machinist

July 18, 2023

Job description

Job Scope and Function

Reporting to the Maintenance Supervisor, this role is primarily responsible for mechanics at a wire & cable production facility. This is an excellent opportunity for an individual with superior problem-solving skills who is committed to continuous improvement.

Responsibilities:

- Ensure health and safety of equipment, workers, and the work environment.
- The mechanic role will perform preventative maintenance, annual safety, perform diagnostics and make repairs on equipment.
- Ability to be flexible with changing priorities
- Ensure adherence to the quality system.
- Effective communication with all levels in the organization and between shifts.

Qualifications:

- Trade certificate, technical diploma, or degree in mechanical field with Red Seal
- 3 - 5 years of previous mechanic experience in a unionized, manufacturing environment.
- Excellent written and verbal communications skills.
- Self-started with proven ability to work independently and act decisively.
- Strong problem-solving and troubleshooting skills
- Experience working in a continuous processing environment.

Physical Demands:

- Frequent need to travel between machines throughout the 120,000 sf factory
- The position follows midnights-afternoons-days shift rotation
