No

If no, please select all applicable reasons from the list below:

Substance, process or technology alternatives are unknown or unavailable

### Progress on TRA Plan - Objectives

CAS RN	Substance Name	Objectives
NA - 01	Antimony (and its compounds)	OBJECTIVES Since antimony is a critical fire retarding component of our finished product we are not able to cost effectively eliminate or replace it in our manufacturing process at this time. However, our goal is to continually evaluate alternatives and work toward improving efficiencies at the facility thereby reducing antimony waste in the manufacturing process. The principles we intend to apply to achieve reductions in antimony waste at the facility include: 1. Eliminate any remaining scrap paths which do not provide reclaim value; 2. Improvements to accounting and measurement methods; 3. Reduction of scrap going to recycle paths; and 4. Material separation to improve scrap recovery.
NA - 06	Copper (and its compounds)	OBJECTIVES Since copper is an essential component of our finished product we are not able to eliminate or replace copper in our manufacturing process however our goal is to continually work toward improving efficiencies at the facility thereby reducing copper waste in the manufacturing process. The principles we intend to apply to achieve reductions in copper waste at the facility include: 1. Eliminate any remaining scrap paths which do not provide reclaim value; 2. Improvements to accounting and measurement methods; 3. Reduction of scrap going to recycle paths; 4. Material separation to improve scrap recovery; and 5. Recovery of copper fines in drawing processes starting in 2013.
