**Subject: California Prop 65 PVC Electrical Cables Statement Rev 1.6**

To Whom It May Concern:

Proposition 65, officially known as the Safe Drinking Water and Toxic Enforcement Act of 1986, was enacted as a ballot initiative in November 1986 in the state of California. The proposition protects the state's drinking water sources from being contaminated with chemicals known to cause cancer, birth defects or other reproductive harm, and requires businesses to inform Californians about exposures to such chemicals.

Proposition 65 requires the state to maintain and update a list of chemicals known to the state to cause cancer or reproductive toxicity.

It should be noted that simply because a component is subject to Prop 65 does not mean that a warning for the finished product is required. Prop 65 warning requirements are dependent on the anticipated level of exposure to components subject to Prop 65 resulting from foreseeable uses of a product. The warning requirements will only apply if the foreseeable and intended uses of a product containing these materials are likely to result in exposures above what are referred to as "significant risk" or "observable effect" levels. A determination of "significant risk" or "observable effect" can only be made with full knowledge of the end uses and applications of the products. Domtech Inc. does not control or have complete knowledge of the end uses to which customers put our materials. Therefore, the decision to include or not include a Prop 65 notice must ultimately be made by our customers.

Domtech Inc. electrical cable products manufactured with Polyvinyl Chloride (PVC) thermoplastic materials may contain the following Prop 65 listed materials:

**A) Electrical Conductors:**

Electrical Conductor Type	Substance	CAS No.	Concentration by weight
Tinned Copper	Lead (in the outside tinned layer)	7439-92-1	250 ppm (of the outside tinned layer)
Copper Clad Steel	Nickel	7440-02-0	0.045% (of steel)

**B) Mixture of Insulation Compounds, Jacketing Compounds, Colourants, and UV additives:**

<b>Substance</b>	<b>CAS No.</b>	<b>Concentration by weight of mixture*</b>
Vinyl Chloride	75-01-4	<= 1 ppm
Silica, crystalline	14808-60-7	0-0.5%
Antimony Trioxide	1309-64-4	0-6%
Arsenic Trioxide	1327-53-3	0-60 ppm
Lead Monoxide	1317-36-8	0-60 ppm
Titanium Dioxide	13463-67-7	0-1.2%
Carbon Black	1333-86-4	0-0.7%
Nickel and Nickel compounds	7440-02-0	0-0.1%
Formaldehyde	50-00-0	0-2 ppm
Di(2-ethylhexyl)phthalate (DEHP)	117-81-7	< 350 ppm
Diisodecyl phthalate (DIDP) (mixed isomers)	68515-49-1	0-4%

\* Mixture consists of Insulation Compounds, Jacketing Compounds, Colourants, and UV additives.
